DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1, 5, and 7 are rejected under 35 U.S.C. 102(b) as being clearly anticipated by Keats U.S. Patent No. 4,422,140. Keats discloses a plant protection system in a nuclear power plant, comprising: a test generating computer (TGC) for generating a test input for self-diagnosis, said test input being inserted between actual safety parameters as a test parameter and a test signal position bit indication position information of the test input (e.g., Fig. 2, col. 1 lines 19-40, col. 4 lines 1-47, col. 6 line 62 – col. 7 line 6, col. 7 lines 47-57);

a trip algorithm computer (TAC) for receiving the safety parameters via a plurality of measuring channels which are physically and electrically isolated from each other and then comparing the safety parameters with predetermined limit values of the safety parameters to determine a trip state of the safety parameters, if there is a test input by said TGC (e.g., Fig. 1a #15);

a voting algorithm computer (VAC) for receiving a trip state of each of the safety parameters determined by said TAC in each of the channels, determining a final state of each of the safety parameters and then outputting the result (e.g., Fig. 1b #19);

and a pattern recognition computer (PRC) for expecting a signal pattern to be input from said VAC based on the test signal position bit which is input through the VAC from the TGC, comparing the signal pattern on a one to one basis with the result determined by said VAC, and then if the signal pattern and the result are not consistent, determining to trip the reactor (e.g., Fig. 1b #20, col. 1 lines 19-64).
